

Mini Lesson Worksheet

Name _____

1. Two lines are graphed on the grid below. Which line is steeper, line *a* or line *b*?

2. Find the slope of line *a*.

Vertical distance from P to Q: _____

Horizontal distance from P to Q: _____

Slope of line a = _____ ÷ _____ = _____

3. Find the slope of line *b*. Then explain how the slopes of line *a* and line *b* confirm which line is steeper.

Vertical distance from C to D: _____

Horizontal distance from C to D: _____

Slope of line b = _____ ÷ _____ = _____

Which line is steeper? How do the slopes confirm this?
