

Mini Lesson Sample Script

1. Identify a triangle by counting its straight sides and pointy corners.

Is this shape a triangle? How do you know?

Answer: Yes. It has 3 straight sides and 3 pointy corners.

T: Look at this shape. I'm going to count the straight sides. Watch me point to each one. 1, 2, 3. Now you whisper count with me as I point.

S: 1, 2, 3.

T: How many straight sides?

S: 3 straight sides.

T: Now let's count the pointy corners. Whisper count with me.

S: 1, 2, 3.

T: This shape has 3 straight sides and 3 pointy corners. We call this shape a triangle. Say it with me.

S: Triangle.

2. Decide whether each shape is a triangle by checking for three straight sides, three pointy corners, and a closed figure.

Is each shape a triangle? How do you know?
Shape A:

T: Here's Shape A. Count the straight sides with me.

Shape B:

Shape C:

Answer: Shape A is a triangle (3 straight sides, 3 pointy corners, closed). Shape B is not a triangle (it is open). Shape C is not a triangle (one side is curved).

S: 1, 2, 3. 3 straight sides.

T: How many pointy corners?

S: 3 pointy corners.

T: Is the shape closed? Can you trace around it without lifting your finger?

S: Yes, it's closed.

T: So is it a triangle?

S: Yes! It has 3 straight sides, 3 pointy corners, and it's closed.

T: Now look at Shape B. Count the corners.

S: 1, 2, 3.

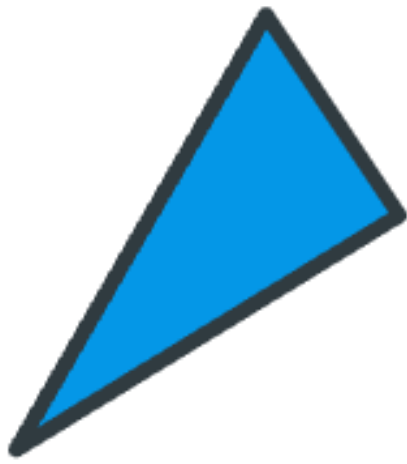

T: Look right here. Does this side connect to the next one?

S: No, there's a gap.

T: If a bug were inside this shape, could it walk out?

S: Yes, through the gap!

	T: So this shape is open, not closed. Is it a triangle? S: No, because it's open. T: Last one. Look at Shape C. Look carefully at each side. Are they all straight? S: No, this side is curved. T: Is it a triangle? S: No. Triangles have all straight sides. T: Right. A shape needs all 3 things to be a triangle: 3 straight sides, 3 pointy corners, and it has to be closed.
3. Circle the triangles and cross out the shapes that are not triangles.	
Look at each shape. Circle it if it is a triangle. Cross it out if it is not a triangle. Shape 1:	T: Look at each shape on your paper. Circle it if it is a triangle. Cross it out if it is not a triangle. S: (Work.)

Shape 2:

Shape 3:

Shape 4:

Answer: Shape 1 circled (triangle); Shape 2 crossed out (4 sides, 4 corners); Shape 3 circled (triangle); Shape 4 crossed out (curved side).
