

Mini Lesson Student Materials

Name: _____

1. Evaluate $4 \times (-3)$ using the number line.

2. Evaluate $-4 \times (5 + (-2))$ two ways.

First, evaluate inside the parentheses, then multiply.

Then, use the distributive property to rewrite the expression as the sum of two products, and evaluate.

Compare the two results to determine the value of $-4 \times (-2)$.

3. Evaluate each expression. Then summarize the rules for the sign of the product when multiplying positive and negative numbers.

a. $6 \times (-7)$

b. $-8 \times (-5)$

c. $-20 \times (1/10)$
