

Mini Lesson Student Materials

Name: _____

1. Which line is steeper, line m or line k ? Then find the slope of each line by drawing a slope triangle between points A and B on each line.

2. Find the slope of line n . Choose two points where the line crosses the intersection of grid lines, then draw a slope triangle to help you.

3. Lines b and c are parallel. The slope of line b is $\frac{3}{4}$. Find the slope of line c by drawing a slope triangle on line c. What do you notice?
